

Lamella[®] Gravity Settler

Inclined Plate Settler

Rebuild & Retrofit

- Parkson-certified labor
- Parkson-certified engineering
- Work performed on-site
- Parkson-certified training upon completion
- Replacing wearable items will reduce the risk of downtime

Have you cleaned your plates?

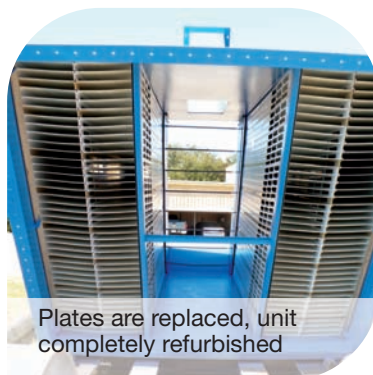

The Lamella® Gravity Settler Rebuild & Retrofit program is a Parkson service that replaces all inclined plates, flumes, feed boxes, weir plates and necessary hardware. During the replacement process, the settler tank can be repaired or sandblasted and recoated if necessary. Upgraded materials for the plates and effluent flumes are also available if required. All Parkson rebuilds & retrofits come with a one year warranty on all replacement parts and labor. Upon completion of a rebuild, a Parkson-certified technician will start-up the equipment and provide operator training.

Examples of Lamella® Rebuild Results

Lamella® Unit Before Rebuild*

Lamella® Unit After Rebuild

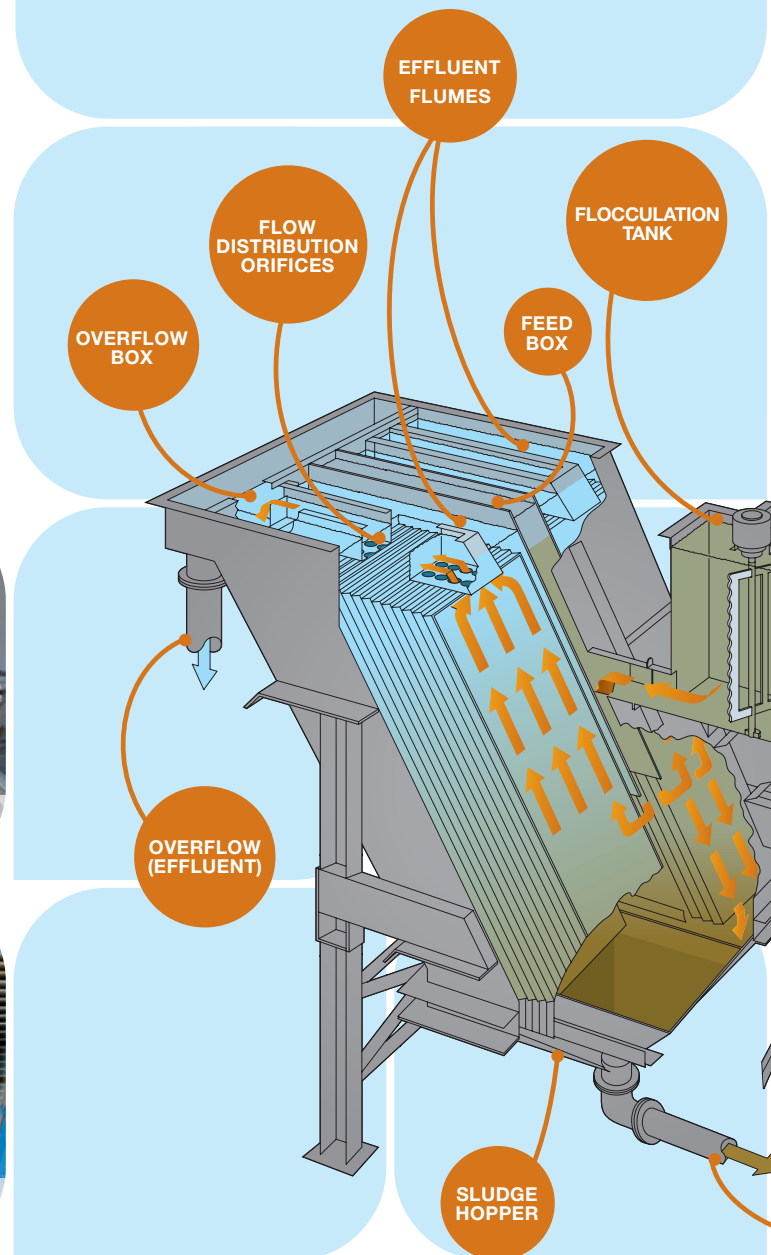

* Photos shown are of equipment that has been in use for 10+ years.

Features

- Complete replacement of plate packs
- Parkson-certified labor

Parkson Rebuild & Retrofit Options

Parkson-Certified OEM Parts

Features

- Customer purchases all recommended Parkson replacement parts and components
- Customer performs retrofit or rebuild without factory, Parkson Field Service or a Parkson-certified installer
- Ideal for operator with extensive operational resources and knowledge

Advantages

- Most economical option if knowledgeable labor is available
- Since no service is provided, 90-day warranty is granted on all parts
- Parkson OEM parts are supplied

On-Site by Owner with Parkson Supervision and OEM Parts

Features

- Hands-on option allows customer to rebuild or retrofit the unit(s) themself on-site using original, certified parts
- On-site supervision from a Parkson-certified specialist
- One-year warranty on the rebuilt equipment

Advantages

- Best overall training opportunity
- Security of a Parkson-certified supervisor
- Parkson OEM parts are supplied

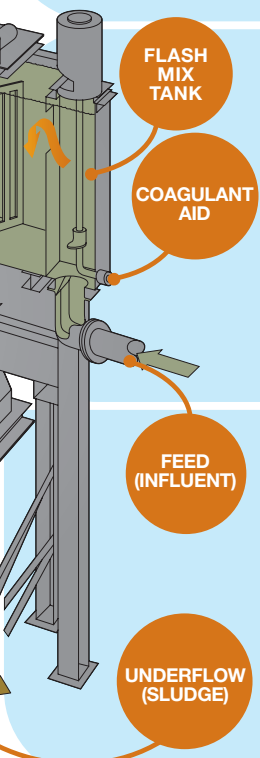

On-site with Parkson Technicians and OEM Parts

Features

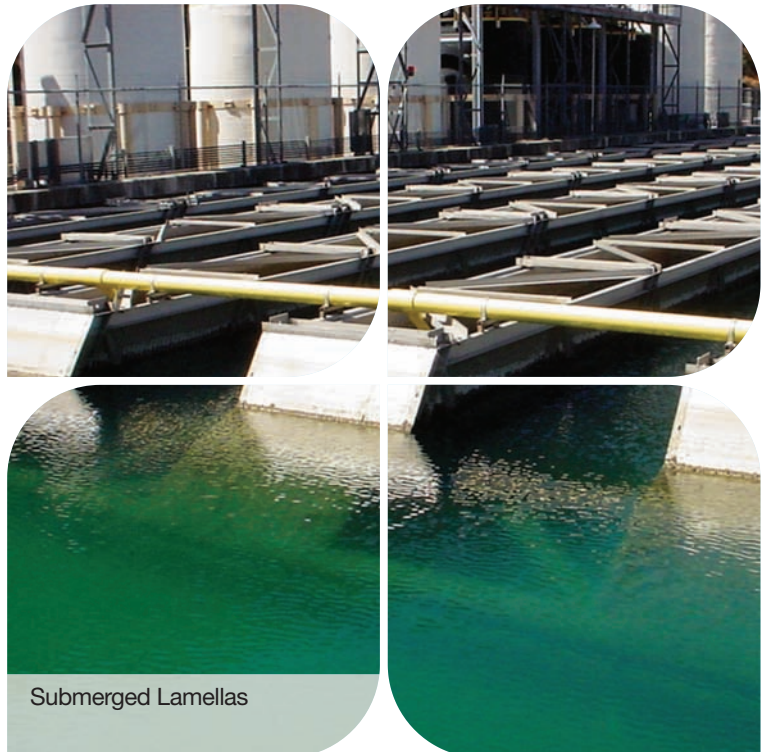

- Parkson-certified specialist will complete the rebuild or retrofit at the customer's facility, replacing all recommended wear parts
- Newly reconditioned unit(s) will be placed back in operation without having been physically removed from the customer's plant
- One-year warranty on the rebuilt equipment

Advantages

- On-site solution
- Allows for additional training opportunity
- Parkson OEM parts are supplied

A rebuilt Lamella® unit delivers like-new effluent quality at a lower cost

Service Maintenance Program

The Parkson Lamella® Maintenance Program will provide the necessary preventative and periodic care to keep your Parkson Lamella® unit functioning optimally. Parkson offers annual programs.

Maintenance Task

General inspection of drives and tank unit

Wash plate packs

Clean hopper bottom

Change oil in flocculator and mixer drives

Check and level effluent weir

Maintenance Service Promotion for Your Lamella® Unit

For customers with annual maintenance programs, Parkson offers a 25% discount on labor associated with specific maintenance event(s) identified between scheduled service calls.

This assumes that customers are complying with Parkson's identified service recommendations and are using Parkson-certified parts.
