

Introducing: DynaSand[®] Segmented Airlift

Upgraded, improved and redesigned with the customer in mind! The once long airlift assembly is now split into 3-4 shorter manageable segments.

Easy shipment!

- Segments fit in smaller, less expensive crates
- Smaller crates in standard box trucks lower freight costs

Easy installation!

- Straight pipe threads between segments
- Shorter segments easier to handle for inserting into air chamber at top of tanks

Easy storage!

- Smaller crate for shelving spares
- Segments eliminate the chance of bending or warping if not flat

Segment replacement!

- Your future airlifts can be replaced in segments vs. the whole assembly
